

As a current XM Radio subscriber I feel that the services provided such as Instant Weather and Traffic for specific areas is one of the best services offered anywhere. It is a service which the Broadcast Stations do not, can not or will not provide to the listening public. It is my belief that to curtail this service at the behest of the National Association of Broadcasters is a very severe infringement on my first amendment rights. I respectfully urge you to reject NAB's petition 04-160. Thank you, I remain

Respectfully

J. Comstock
